

ADAMUS One Specification Sheet

The One Station Tablet Press is a perfect solution for small manufacturing or R&D purposes where small amounts of tablets or samples are needed for trials.

The Adamus One, single station tablet press is a heavy-duty solid dose research and development tool. An excellent solution for the beginning stages of single and multi-layer product development, also when only very small quantities of material are available. Utilizing standard TSM or EU, size "B" or "D" tooling the Adamus One can produce 100kN of compression force. Compression and ejection force are displayed on a digital meter.

Adamus One	Manual Hydraulic Press
Number of Stations	1
Maximum Tablet Diameter	25mm
Main Compression Force	10 Ton (100kN)
Tablet Capabilities	Single/Multilayer
Depth of Fill	20mm
